

Our Best Selling Conveyors

MODEL TA

A very versatile conveyor, the Model TA can be used in many types of material handling situations such as assembly line operations, sorting, packing and inspection. Conveyor sets up quickly and easily to save on installation time.

MODEL TR

The Model TR, with built-in guard rails, is ideal for factory assembly operations.

MODEL TL

The Model TL with its rugged, heavy-duty construction is ideally used for long assembly line operations, inspection, testing, sorting and packing. Can be floor supported or ceiling hung.

MODEL SB Horizontal Belt Conveyor (Slider Bed)

The Model SB is ideally used for assembly line operations, inspection, testing, sorting and packing.

MODEL RB Horizontal Belt Conveyor (Roller Bed)

The Model RB is designed to move heavier loads. Roller bed design reduces belt friction and provides greater capacity. Applications include: assembly, inspection and packing operations.

MODEL TH Trash Belt Conveyor

The Model TH is designed to handle cardboard boxes, paper trash and fabric moving to compactors. Can be floor supported or ceiling hung.

MODEL SBI Floor-to-Floor Incline Conveyor (Slider Bed)

The Model SBI is a floor-to-floor incline conveyor. It is equipped with a powered feeder at the infeed end to insure a smooth transfer from the incline to the horizontal plane. Inclines are easily adjusted up to 25°.

MODEL RBI Floor-to-Floor Incline Conveyor (Roller Bed)

The Model RBI is a floor-to-floor incline conveyor. It is equipped with an adjustable double nose-over at the discharge end. Inclines are easily adjusted up to 25°. Roller bed design reduces belt friction and provides greater capacity.

MODEL TS 1500 High Speed Curve Conveyor

The Model TS 1500 provides a positive flow of products by means of a belt, driven by tapered pulleys. Conveyor is versatile in that it can transport a wide variety of products.

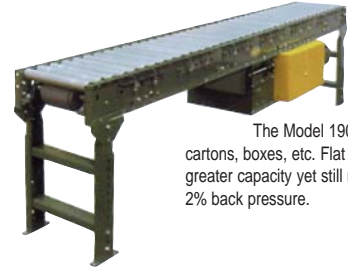

MODEL 138/190-ACC Horizontal Power Conveyor (Accumulating Type)

The simplest method ever devised for accumulating cartons, boxes, etc. Basic design eliminates complicated adjustments and allows a minimum 2% back pressure.

MODEL 138/190-LRC Live Roller Curve Conveyor

The Model 138/190-LRC is a medium-duty live roller curve that provides a positive drive for negotiating 90°, 60°, 45° or 30° turns. It may be self-powered or can be slave driven.

MODEL 190-ACZ Horizontal Power Conveyor (Accumulating Type)

The Model 190-ACZ accumulates cartons, boxes, etc. Flat belt design provides greater capacity yet still maintains a minimum of 2% back pressure.

MODEL 138/190-NSP Live Roller Conveyor

The Model 138/190-NSP Live Roller Spool Conveyor is a general transport conveyor with the capabilities of accumulating products with back pressure. Quiet operation, versatile design, easy installation and low cost.

MODEL 190-LR Horizontal Power Conveyor (Live Roller)

The Model 190-LR can be used for transferring or deflecting boxes, etc., onto or off of conveyor line.

MODEL BA Portable Folding Booster Belt Conveyor

One lever control adjusts angle without effort. Desired angle automatically locked by powered screw.

MODEL 25/26-CRR Chain Driven Live Roller Conveyor (Roll-to-Roll Type)

The heavy design of the 25/26-CRR allows it to be used for conveying higher load capacities such as loaded pallets and drums. Chain driven rollers make it ideal for conveying oily parts and skids in most industries.

MODEL 25-CRRCT Chain Driven Live Tapered Roller Curve Conveyor (Roll-to-Roll Type)

The Model 25-CRRCT is a heavy-duty, chain driven live roller curve with tapered rollers. The tapered rollers assist in keeping pallets orientated while passing around curve.

MODEL 36-CRRH Heavy-Duty Chain Driven Live Roller with Hex Shaft (Roll-to-Roll)

The Model 36-CRRH is a very heavy-duty conveyor with 3 1/2" diameter rollers.

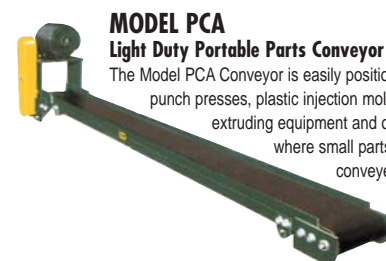

MODEL PC Portable Parts Conveyor

The Model PC can be used as a portable or permanent parts conveyor. Side guards and cleated belt easily catch small stampings, plastic parts, etc., and carry them to totes or inspection stations.

MODEL PCX Low Profile Portable Parts Conveyor

The portable Model PCX parts conveyor can be easily positioned under punch presses and extruding machines to catch small steel, plastic, or aluminum stampings, etc. Conveys them quickly to totes or inspection stations.

MODEL PCA Light Duty Portable Parts Conveyor

The Model PCA Conveyor is easily positioned in or under punch presses, plastic injection molding machines, extruding equipment and other machinery, where small parts can be quickly conveyed.

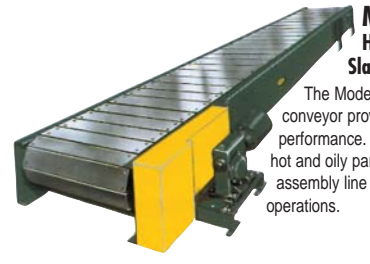

MODEL TW Horizontal Wire Mesh Belt Conveyor

The Model TW with wire mesh belt can carry hot, cold or oily parts.

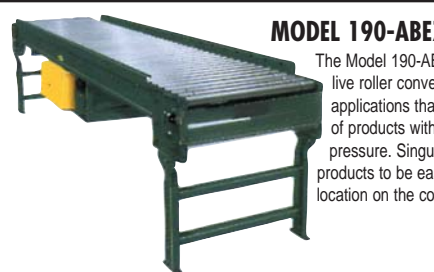

MODEL WC Power Curve Conveyor

The Model WC with wire belt can carry hot, cold or oily parts.

MODEL SL Heavy-Duty Horizontal Slat Conveyor

The Model SL Steel Belt Slat conveyor provides lasting, dependable performance. Can be used to convey hot and oily parts. Can also be used for assembly line and production operations.

MODEL 190-ABEZ

The Model 190-ABEZ is a horizontal live roller conveyor, designed for applications that require accumulation of products without a build-up of line pressure. Singulation feature allows products to be easily removed from any location on the conveyor.

MODEL 138/190-NSPEZ

The Model 138/190-NSPEZ is a horizontal live roller conveyor, designed for Zero-Pressure Accumulation of product. Positive braking in each zone reduces the possibility of damage to fragile items during accumulation. Singulation feature allows products to be removed from any location on the conveyor.

MODEL PCH Piano Hinge Parts Conveyor

The Model PCH parts conveyor with hinged steel belt is ideal for carrying hot, oily parts from punch presses, hoppers, or other operations. Configurations range from straight to "Z" type units.

MODEL 2511-CREZ

The Model 2511-CREZ is a chain driven live roller conveyor designed to handle loads such as pallets, drums, etc. Items are accumulated with "Zero-Back Pressure" reducing the possibility of collisions that may result in product damage.

MODEL 25 CREZ

Our favourite pallet handling workhorse. Zero pressure. Heavy pallets up to 3000 pounds per zone. Quiet. Fewer mechanical components for lower maintenance.

MODEL DCEZ

The Model DCEZ is a drag chain conveyor designed to handle pallets. With EZ-Logic accumulation modules, pallets are accumulated with Zero-Back Pressure reducing the possibility of collision that may result in product damage.

Gravity ROLLER - Gravity Roller Conveyor

Wide range of sizes to pick from:

- 1" Dia. x 16 Ga. & 11 Ga.
- 1 3/8" Dia. x 18 Ga. & 11 Ga.
- 1 7/8" Dia. x 16 Ga. & 9 Ga.
- 2 1/2" Dia. x 11 Ga. & 14 Ga.
- 2 5/8" Dia. x 7 Ga.
- 3 1/2" Dia. x 9 Ga. & .300"
- 2" Dia. x 12 Ga.

Useful in setting up permanent or temporary conveyor lines in warehousing activities, shipping departments, assembly areas, etc. Majority of products will convey with minimum amount of pitch.

Gravity ROLLER Gravity Roller Curve Conveyor

Gravity Roller Curves add to the versatility of straight conveyors. Curves provide smooth product flow through 90°, 60°, 45° and 30° turns. Curves will convey product with minimum amount of pitch based on weight and size. Guard rails (optional item) may be added for product protection.

Gravity WHEEL Gravity Skatwheeler Conveyor

Gravity Skatwheeler conveyor is used to convey lightweight packages or when operation requires lightweight sections. Useful in setting up temporary conveyor lines in warehousing activities, shipping departments, assembly areas, etc.

FLEXIBLE Model "FX 200" Heavy-Duty Flexible Gravity Skatwheeler Conveyor

A proven performer for trailer loading and unloading. Ideally suited for packaging, shipping and flexible assembly lines.

Conveyor Rails

Wheel Conveyor Rails are made up of standard skatwheels mounted to various angle-channel configurations. They provide a means of economical storage.

Ball Transfer Table

The Ball Transfer Table is used when products are required to be manually rotated or correctly positioned, such as a work station or other similar operation that requires quick, easy handling of the product. Ball Transfer Table is also used when more than two conveyor lines converge and packages must be transferred from one line to another.
